This diagram shows a second embodiment of the device from a perspective view. It features a similar overall design to FIG. 9, with a base assembly (100) supporting a central rotating component (106). The top surface includes a rectangular opening (118) and a circular feature (110). A cylindrical protrusion (114) is located near the center. The side profile shows various structural elements labeled 136, 148, 170, 164, 134, 168, 160, 138, 146, 132, 142, and 138. An arrow points to the right side of the device.
